

SILENT KILLER

What does 2 minutes of cell phone use do to your brain?

Swedish brain surgeon, Leif Salford proved that it only takes 2 minutes of being exposed to cell phone radiation to cause cell death.

Children's brains are penetrated 75% more by cell phone radiation. Just 2 minutes on a cell phone can negatively impact a child's bio-field for more than an hour later.

The microwaves from just 15 minutes of cell phone use by an adult can heat the brain to dangerously high levels. EMF harmonizing chips can neutralize the danger.

Did You Know?

Talking 500 minutes per month on a cell phone increases the probability of brain cancer by 140%. Some studies show up to 300 percent increase when using the cell phone between 500 and 1,000 minutes per month. *Source: Wire Technology Research, Second State of the Science Colloquium Book; January 2001, Journal of the American Medical Association; Early Hardell studies.*

Teenagers talk on cell phones an average of 2600 minutes per month. *Source: Safe Wireless Initiative study conducted in Buffalo, New York in early 2005*

There are 30,000 to 50,000 new cases of brain and eye cancer each year worldwide attributed to cell phone usage. *Source: Epidemic Curve, Safe Wireless Initiative.*

Leading health experts are worried about the future of peoples' wellness and how the rapidly emerging toxic state, called *ElectroPollution*, may be silently accelerating the aging and disease processes, increasing stress levels and preventing essential nutrients from entering the body's cells.

Cell phones and other electronic and electrical devices emit EMFs – ElectroMagnetic Fields - that are linked with health problems such as stress, fatigue and multiple diseases including brain tumors.

Discover the breakthrough products and technologies powering the world's first patented and proprietary solutions to counteract the negative effects caused by ElectroMagnetic Radiation and find a whole new way to revive your youthfulness and enhance your wellness. Discover [The Solution](#) for yourself.

One person's experience:

*"Prior to putting the Cell Chips on my phone, I wanted to get tested by a very well-known doctor in my area who is both highly intelligent and highly skeptical about most 'wellness products.' Although his credentials are in the medical arena, he is very naturopathic in practice and an expert at kinesiology. He has tested many so-called devices for 'protecting you from cell phone radiation,' so he was well-experienced with the subject and knows about the dangers of EMFs. So, when my appointment came, we first tested a live connection on my phone - both with and without my headset - BEFORE putting the Cell Chips on my phone. **It was very obvious that both the phone and the headset were disruptive to my body.** Then, keeping the same live connection, we put the biochips on the back of the phone and tested again - wow, the difference was like night and day! **The most amazing and exciting part though was the doctor's reaction. He said, 'This is the first device I've ever tested that has actually worked!' ...and then he bought two units for himself and his wife right on the spot! That of course, spoke volumes to me. Thank you for bringing this product to the marketplace so we can have protection in this vital area!"***
